Our claim: Your well-being

Areas of expertise

Here is an overview of our specialist departments:

AESTHETIC MANAGEMENT

The laser institute „aesthetic management“ offers services in dermatological laser treatment and in aesthetic-plastic surgery at the highest medical level.

Perfect treatment results are achieved through consistent specialization and the many years of experience of our highly qualified specialists, through permanent quality controls and through continuous training.

ANESTHESIA

In order to ensure an optimal surgical procedure with optimal results, our anesthesia team has concentrated on the principle of so-called fast-track anesthesia. This means that the individual anesthesia is as gentle as possible for you, with the least possible pain and the earliest possible discharge from the hospital.

GENERAL MEDICINE / INTERNAL MEDICINE

The diagnostics and treatment focuses on the areas of angiology, endocrinology and diabetology, gastroenterology, hematology and internal oncology, cardiology, nephrology, pneumology and rheumatology.

SURGERY

Our surgical team consists of four highly qualified specialists who have been working together for many years. Two experienced assistant doctors support you in all areas. The team specializes in joint-preserving, reconstructive surgery and prosthetics for the shoulder, hip and knee. The aim is to offer every patient the best medical solution to their problem.

HAND SURGERY

We treat and operate on trigger fingers, Dupuytren's contracture, carpal tunnel syndrome and chronic wrist pain, among other things.

LASER CENTRE

Permanent hair removal, scar and port-wine stain treatments, wart and scar-free tattoo removal are

carried out with the latest generation of laser technology.

ENT

Our experienced and highly qualified ENT specialists offer the complete range of diagnostics and treatment methods in the ear, nose and throat area. This includes diagnosis and therapy for allergies, diseases of the paranasal sinuses, hearing disorders, dizziness and tinnitus.

NEUROSURGERY

In the field of neurosurgery, diseases of the central nervous system are diagnosed and treated. These include diseases of the brain, skull, spine, spinal cord and peripheral nerves.

ORTHOPEDICS JOINT SURGERY

Our highly qualified orthopedic team diagnoses and treats all injuries and diseases of the musculoskeletal system.

ORTHOPEDIA PLASTIC-AESTHETIC SURGERY

Our many years of experience and specialist plastic-aesthetic surgeons perform, among other things, liposuction, breast augmentation and reduction, face lifts, wrinkle treatments as well as nose and chin corrections.

PAIN THERAPY

We basically treat all patients who suffer from pain with an individual therapy concept that is specially tailored to the pain problem.

UROLOGY

We offer comprehensive advice, treatment and care for all questions relating to urological diseases and questions. These include, for example, bladder problems, unwanted urine leakage, constant urge to urinate and prostate diseases and disorders.

VEIN CENTRE

The main areas of treatment in our vein center include branch varicose veins and the smallest spider veins in varicose veins of all sizes. Another focus is on the treatment of arterial circulatory disorders and lymphedema diseases.
