

Eilenriede Klinik eng

Our claim: Your well-being

General medicine / internal medicine

GENERAL MEDICINE / INTERNAL MEDICINE

In our practice for general medicine, we offer you general medical, family doctor and naturopathic services. Our goal is to help our patients both in the treatment and in the prevention of diseases in the long term – and to do so as holistically as possible: We use the well-founded and comprehensive diagnostic and therapeutic options of classic general medicine. In addition to this, we offer you therapies from various areas of naturopathy. This allows us to develop a therapy concept that is tailored to you personally from a variety of treatment methods.

Our diagnostics and treatment focuses on the areas of angiology, endocrinology and diabetology, gastroenterology, hematology and internal oncology, cardiology, nephrology, pneumology and rheumatology.

The areas of internal medicine and general medicine are located directly opposite the Eilenriede Clinic in the Medical Care Center (MVZ) on Emmichplatz.
