Our claim: Your well-being

Orthopedics joint surgery

SPECIALIZED IN JOINT PRESERVING, RECONSTRUCTIVE SURGERY AND PROSTHETICS ON THE SHOULDER, HIP AND KNEE

We are a small team of four specialists who have been working together for many years. Two experienced assistant doctors support us in all areas. We specialize in joint-preserving, reconstructive surgery and prosthetics for the shoulder, hip and knee. We have always been united by the goal of providing every patient with the best medical solution to their problem. Our aim is to apply all available surgical procedures perfectly: arthroscopy, cartilage and ligament reconstruction, soft tissue interventions, bone corrections (osteotomies), partial and full prosthetics of the joints.

As a patient, you can rest assured that you will be advised and treated according to the best known standard. Our recommendations often differ from those of other doctors. Many of our patients have already undergone surgery and have had negative experiences. You can be assured that we will advise you and treat you operationally to the best of our knowledge and belief and in accordance with the highest international standards. We have no economic ties to companies or implants and always use those products that we consider to be the best.

Each of us doctors consults thousands of patients every year and performs hundreds of complex operations. Through consistent specialization, we can continuously improve our techniques. We are often involved in the development and introduction of innovations. Our database system allows us access to all patient data as well as all X-ray, MR and arthroscopy images of our now 25,000 patients at any time. Daily case conferences serve internal quality assurance. Constant follow-up examinations of patient groups, made possible by our own scientific association, confirm our concept.
