Plastic-Aesthetic Surgery

PLASTIC-AESTHETIC SURGERY

Our competence center has been offering plastic and aesthetic operations at the highest medical level for 25 years. Consistent exchange of experiences, e.g. B. with Brazilian and American plastic surgeons, enables us to ensure the highest quality standards in the interests of the best possible outcome for our patients. We often carry out corrections of sub-optimal operations performed by other institutions.

We organize training, further education and training events for other doctors.
